NOTE TO: Deputy Director for Planning and
Coordination

SUBJECT: "Management" Guidance from OMB

STAT

I agree with Ross' note that we are in good shape on FMFIA and are currently preparing annual reports as a result of your 30 October memorandum. As to Value Engineering, the Office of Logistics is preparing a response for OMB indicating that the Agency will comply with that requirement within the bounds of security. As a matter of fact,  indicates that the Value Engineering requirement is currently being written into a  contract that the Office of Communications is negotiating with Timeplex.

Deputy Director for Planning and Coordination

Could you please take a look at Bill Donnelly's note to [redacted] and let me have a quick DDA opinion on what more, if anything, we need to do in this regard? (I think we are in good shape on FM FIA requirements; "Value engineering" is new to me, however -- I don't have any idea how we stand in that area.)

Thank you.

⊗ Larry's note of 10/30/89 kicks off this annual exercise.

NOTE TO: Deputy Director for Planning and Coordination

SUBJECT: "Management" Guidance from OMB

Two documents have been brought to my attention in the last few weeks, which I suggest need someone to take a look at, from an overall Agency viewpoint (copies are attached). If CIA is to be excluded from this process, great! But that should be made official somehow.

The Agency, in my experience, in recent years has not taken very seriously this type of guidance or reporting requirement from OMB. (We have determined that the attached documents were sent by Larry Sandall to the DDA, Comptroller and the IG for information. No action was called for.) Perhaps we get more done quicker because we have not concerned ourselves with this type of thing.

But with Darman talking about the "M" in OMB and the likely appearance of a Statutory IG on the scene, someone had better take a serious look at these OMB requirements. By the way, the FMFI Act is a law.

William F. Donnelly

MEMORANDUM FOR HEADS OF EXECUTIVE AGENCIES AND DEPARTMENTS

FROM:

Allan V. *Butman*
Deputy Administrator and
Acting Administrator

SUBJECT: Value Engineering

Office of Management and Budget Circular No. A-131, Value Engineering, was issued on January 26, 1988 to require the use of value engineering, as appropriate, by Federal agencies and departments. The Circular was issued in response to hearings held by Senator Levin in April 1987. The hearings and prior GAO reports concluded that greater use of value engineering would result in substantial savings to the Government.

Circular No. A-131 identifies specific management and procurement practices that must be followed by agencies and departments in implementing value engineering programs. The value engineering reports for FY 1988 that were submitted in compliance with Circular A-131 indicate that over \$2 billion was saved (most by the Department of Defense) through the use of value engineering. A summary of the data from the FY 1988 reports is attached for your review.

Senator Levin, Congresswoman Collins, and other Congressional members are concerned about the uneven implementation of Circular A-131. Some agencies and departments did not report any savings or the commitment of any resources to value engineering in the FY 88 annual reports, leading to the argument by some that the Circular is not effective and that legislation is required to mandate the use of value engineering. While value engineering cannot be applied in all situations, we need to make certain that appropriate actions are taken to implement the Circular to the maximum practicable extent.

A copy of the report format to be used in reporting FY 1989 value engineering data to OFPP was mailed to all agency and departmental value engineering contact points on September 12, 1989. The FY 1989 report formats are to be completed and returned to OFPP by January 1, 1990. Your cooperation and help in reviewing the FY 1989 reports to ensure that Circular

NOTE FOR: EXO/OMS

FROM: EXA/DDA

SUBJECT: Overtime Task Force

Mike,

1. Attached is a copy of the charts which were used at the DA off-site to brief the findings and recommendations of the Overtime Task Force. The briefing went well and the Office Directors agreed to work towards achievement of the goals specified in Recommendation #1.

2. Also attached is a report which we'll be updating on a monthly basis. This report will be accompanied with an office breakdown by individual reflecting overtime worked and dollars expended. We will meet to discuss how we did in October on Thursday, November 16 at 0800 in the DDA's Conference Room. After that we will plan to meet the 2nd Tuesday of each month at 0800. Please call if you have any questions.
